

Name: Ana Vasquez

Personal Goal:

- Health: Keep a healthy lifestyle so much that I am still fit by 65 y.o.
- Career: Become an NLP specialist in the Philippines.

Hobbies:

- I go to the gym. I started my fitness journey in August 2024, and am now consistently going to the gym 4x a week. I got the help of a personal trainer (PT) and am making progress.
- I used to draw and was in the art club in high school. After graduating college, I spent one year as an animator. I drew cartoons for a living, before realizing it didn't pay well enough. I transitioned into tech after as a software engineer.
- I also like dancing, and sometimes go to dance classes.

Current Role:

- I am an Data Science Intern for Netopia AI. From Netopia AI's website:

Studying human behavior presents a formidable challenge due to their intricate complexity and high variability. Influenced by a myriad of factors, from biological predispositions, cultural norms, and evolution of societies, human behavior is dynamic and intrinsically complex.

We are building a Large Behavior Model to disrupt the fragmented, narrow, and non-scalable approach to understanding of behavior. Translated into technology, LBM serves as a comprehensive, intelligent platform that unites a broad spectrum of scientific disciplines and industries, encompassing psychology, behavioral economics, sociology, and related fields, to provide deep and multidimensional insights into how diverse behavioral profiles, predispositions, social and cultural norms, and physical environments impact and shape behavior.
